

# NAVYOM WASTE MANAGEMENT

## 2025 Dubai Waste Compliance Checklist

AI-Proof Segregation Strategies • ZERO Fines • 40–70% Cost Reduction

Exclusive Navyom Edition – Updated December 2025

■ 058 521 1155 ■ [www.dubaiwaste.com](http://www.dubaiwaste.com)

## 1. Waste Categories You MUST Segregate (2025 DM Rules)

Segregating waste correctly prevents AED 10,000–100,000 fines and ensures 100% WTN approval. **Concrete Only:** Bricks, tiles, rubble. No wood/plastic/gypsum.

**Gypsum Only:** Pure drywall. DM AI flags even tiny contaminants.

**Metal Only:** Steel, aluminum, cables. Strip insulation fully.

**Wood Only:** Pallets, timber. Remove long nails/paint.

**Excavation Sand/Inert:** Clean soil, rocks. Zero plastic allowed.

**Packaging Waste:** Cardboard, shrink wrap.

**Hazardous Waste:** Paint tins, batteries, chemicals. Stored separately. **Pro Insight:** Clean segregation increases recycling from 10% → 90%+

## 2. DM AI Photo Recognition Triggers (How to Beat Auto-Rejections)

DM AI scans for contamination using texture, color, and shadow detection. **Texture Mismatch:** Wood/plastic in concrete = instant auto-reject.

**Color Detection:** Bright objects trigger anomaly flags.

**Shadow Profiles:** Foam/plastic bags create irregular shapes.

**Density Mismatch:** AI checks volume vs declared category.

**Unexpected Shapes:** Buckets, planks detected via edge recognition. **Penalty Note:** AED 10,000–50,000 fines under Executive Council Resolution 58/2017.

## 3. 2025 WTN DO & DON'T CHECKLIST (Zero Rejection Protocol)

### DO:

- Upload 4 clear photos (top, sides, inside)
- Declare exact waste category
- Verify DM-approved truck/driver
- Use AI scanner apps before loading

### DON'T:

- Submit contaminated loads
- Mix wood/gypsum with demolition
- Use blurry/night photos
- Reuse WTNs (DM flags as fraud)

## 4. Mandatory Worker Training (Daily 2-Min Compliance Drill)

- Color-coded skip labels with QR guides
- Picture verification before loading
- Reward clean segregation weekly
- Drone scans for large sites
- “Question Bin” for doubtful items

## 5. Emergency Correction Protocol (Avoid AED 4,000+ Return Fees)

1. Stop loading immediately
2. Remove contaminants manually
3. Retake photos & reassess
4. Resubmit WTN with corrected category

5. Reroute truck if needed
6. Document with logs/photos for audits

## **6. Navyom Support (Your 24/7 DM Compliance Partner)**

- AI-style skip inspections
- Category verification & photo validation
- On-site training + drone compliance audits
- Hazardous waste support
- WTN resubmission & emergency corrections
